

# L-INE

## Functionality in perfect form

38

The tall spout and the L-shape make the KLUDI L-INE a stylish design feature. Round, harmonious shapes define the overall look of the series. The pull-out telescopic spout expands the range of motion. The gentle laminar jet is easy to control with the slender lever and ensures that the water does not splash

when it hits the sink. Whether classic one-hole or stylish two-hole fittings: The fine lines and clean design of KLUDI L-INE make it ideal for modern, minimalist kitchens. To enable you to make best use of your sink, KLUDI L-INE offers you features like the multi-connection and the bayonet fitting.

Winner

KLUDI L-INE S is our re-interpretation of the classic L shape. The design follows a traditional line and looks powerful, yet delicate. One example of this is the ergonomically positioned, particularly broad handle lever that makes operation more convenient. The slender

pull-out spout also highlights the fitting's minimalist nature. You can choose between different surfaces based on your personal preference, such as chrome, the combination of white and black chrome and now also available in elegant matt black.
