Our Patent Pending Kits Saves Time & Hassle

CC-KIT

2" CC-KIT NOW AVAILABLE

CC-KIT2

The 1½" Multfit Washer gives a perfect fit on virtually all pans.

HK-CC-X1

Close Coupled Kit

Installers know that fitting current Close Coupled Kits are a complete faff! The bolts move about and the wing nuts and washers are a nightmare to locate and tighten up. How many times have you dropped the lot when trying to fit one?

The McAlpine Close Coupled Kit uses a patent pending plate that holds the bolts tight in place.

The patent pending bolts have a **tapered end with no thread**, this makes locating and tightening the solid stainless steel nuts a breeze.

It will literally take **under 30 seconds* to secure**. The less time staring into a customer's toilet, the better.

*In tests with our own Sales guys, so you should be able to do it even quicker!

Cistern Bolt Kit

For newer toilets, the through bolt Cistern Bolt Kit uses the same patent pending bolt with a tapered end to make it **easy to locate**, even behind the toilet pan when you can't see what you are doing.

The ribbed edge means you can spin the nut straight up and tighten it by hand, and it doesn't bite into your fingers.

There's also no need for a washer as the base of the nut is wider than a washer.

Like the Close Coupled Kit, it's made from quality stainless steel and it's a real time saver!

Tackles the Toughest Jobs, No Sweat!

McAlpine Super Strength Gloves help you tackle even the toughest jobs, no sweat! With **textured fingertips**, our **Black Nitrile** gloves protect you from a wide range of chemicals, solvents, and grease without sacrificing grip! Best of all, our medical-grade, powder-free Black Nitrile keeps your hands comfortable and sweat-free for longer.

- **Withstands a wide range of chemicals**, solvents, and grease
- Shelf-Life: **3 years** from the manufacturing date
- Glove length: **Min 240mm**
- Available in **Medium**, **Large**, and **X-Large**

Better For The Environment

Our premium black nitrile gloves are more environmentally friendly than standard nitrile gloves. Once disposed of, our gloves biodegrade **up to 20x faster** than standard gloves. That's years instead of centuries! Protecting the environment and you without sacrificing quality. Tests show our gloves can biodegrade by **36.7% in 513 days**, reducing non-degradable waste and protecting the environment.

Protecting You from the Messiest Jobs

With textured fingertips, our Black Nitrile gloves protect you from a huge range of chemicals, solvents and grease without sacrificing grip! Our gloves are made with tradespeople in mind. Protecting the environment, and you, without sacrificing quality.

AVAILABLE IN: **MEDIUM** (GL-M), **LARGE** (GL-L) and **X-LARGE** (GL-XL).

Mactun **Tundish**

The only **combined tundish and non-return** valve with a silicone membrane seal ensuring it will not be affected in hard water areas.

The Mactun Tundish incorporates a self closing membrane which opens to allow the discharge to flow freely and then closes to form a seal to prevent foul odour or sewer gas entering the building when installed into a waste or soil pipe.

Product Benefits

- **Will not splash**
- TEMP RATING : **100°C**
- Suitable for all Cylinder, Boiler, PRV, Water Heater and Air Conditioning discharge
- MACTUN-1 **15mm** inlet x **22mm** outlet
- MACTUN-2 **15/22mm** inlet x **1¼"** outlet
- WRAS & KIWA Approved

kiwa certified KOMO K100978/01

x **22mm** Compression Outlet

MACTUN-2

15/22mm Compression Inlet x **1¼"**
Universal Compression Outlet

Just the ticket for discharging condensate into the waste pipe. Used this for air conditioning condensate, **no smells** during winter months when in heating mode.

McALPINE SolvPro

Solvent **Cement**

It's not just **solvent weld.** It's **problem solved.**

Tired of a solvent weld that goes gloopy halfway through the tin? McAlpine SolvPro changes the game. Packaged in a durable, recyclable aluminium can, SolvPro stays usable, meaning less waste and more value.

Forget those messy brushes! Our unique cotton wool dauber delivers **precise application**, giving you a professional finish every time. No more drips, no more waste, and a flawless joint.

SolvPro's clear application and rapid cure speed up the job. But **the real innovation is our UV additive**. Use a UV torch to check your seal is 100% watertight before you box in. Complete confidence, no leaks, no comebacks.

No Mess

Say goodbye to wasted solvent weld. Our aluminium cans keep SolvPro fresh and ready to use, maximising your investment.

Dauber Applicator

The cotton wool dauber gives you ultimate control, reducing mess and ensuring a perfect joint every time. It reaches to the bottom of the can, so nothing is wasted.

UV Detectable

Our unique UV additive allows you to visually verify the integrity of your seal with a UV torch. No leaks, no worries, and fewer callbacks.

Low VOC

We care about your health and the environment. SolvPro's low VOC content minimizes harmful emissions being released.

Fast Setting

SolvPro's medium-fast set speeds up the job, and its clear application ensures a clean, professional look.

SVPR-1
237ml

SVPR-2
118ml

> With SolvPro's UV additive, you know it's watertight before you walk away. No leaks, no callbacks, just pure confidence.

McALPINE

McAlpine **Multifit**

- Most McAlpine trap outlets and fittings have Multifit connections
- Multifit connections suit all plastic waste pipes to **BS EN 1451-1: 2017** and **BS EN 1329-1: 2020**, copper pipe (metric or imperial) and lead pipe
- The moulded internal sleeve of the connection, centres and supports the pipe. The Multifit and friction washers ensure a **secure seal** is made between the pipe and the wall of the fitting. When the compression nut is turned hand tight **the best possible mechanical joint** is complete
- For technical reasons, it is not possible to manufacture Multifit connections on all traps and fittings. Where Multifit is not provided the description **universal is applied**. The only difference being that universal does not have an internal sleeve within the trap or fitting
