EVOLVE

In an industry where tradition and technical mastery are essential, EVOLVE represents our drive to push boundaries. It's not just about change — it's about purposeful evolution, transforming decades of expertise into new ways to create, design, and connect with the world.

EVOLVE defines who we are: a company that doesn't simply follow market trends, but sets its own direction through innovation, digital transformation, and applied creativity. Every step we take — from advanced material research to the development of digital tools and immersive experiences — reflects our belief that ceramics can also stand for cutting-edge innovation.

EVOLVE is more than a tagline; it's our statement of intent. It reflects a dynamic company, constantly moving forward, one that understands the future isn't something you wait for — it's something you build. And we build it layer by layer, piece by piece, innovation after innovation.

CAMPASPERO Stone

V2 Destonified

Campaspero is born from matter in its most essential state. From earth transformed into fragment, into dust, into mineral. Tiny particles that time patiently brought together to create something balanced, serene, and full of meaning.
There is a quiet greatness in what is built from the smallest elements. It lives in every piece, every texture, every surface designed to live in harmony with space. Immensity is not always about size — sometimes it is the precise sum of thousands of invisible elements working together.

Each Campaspero piece conveys this duality between simplicity and depth. Fragments, dust, mineral... transformed into something close, honest, and tangible. Something that may seem simple at first glance, yet holds a story far greater within.

LITHOS

Stone

V2 Destonified

Lithos is born from a simple idea: stone as a witness. Before cities, languages, or myths, rocks already existed, accumulating time, pressure, and change. The word Lithos comes from the ancient Greek λίθος, meaning stone: something solid, real, and enduring.
In ancient Greece, stone was not just a building material; it was part of the landscape and part of how people understood the world. Temples, roads, and cities were made from the same material as the nearby mountains. Lithos is inspired by this direct relationship between people and something much older than them.
Stones may seem unchanging, but they hold vast stories. Every vein, every crack, and every layer preserves a different moment in the planet's history. Lithos starts from this simple curiosity: looking at something that has always been there and wondering how long it has truly been part of our story.

CASTELLO Basics

V2 Destonified

Castello is created to bring character and elegance to any space. Its forms echo the solidity and distinction of great historic constructions, conveying a sense of strength, balance, and presence. It is a series designed for those who understand design as a way to express identity.
Its relief creates a visual play full of nuances, where light glides across its surfaces, generating depth and movement. Each piece adds rhythm to the whole, transforming wall covering into an element with a life of its own, capable of elevating the aesthetics of a space effortlessly.
Castello is personality transformed into volume. A unique proposal within the world of wall coverings, created for projects that seek to stand out and leave a lasting impression. A series that turns every wall into a statement of style.
